**ARCserve D2D™ Bare Metal Recovery**

**CA ARCserve D2D Bare Metal Recovery (BMR)**  
**- Adjust Disk Partitions**

You can adjust the disk/volume configuration on this screen. You can also select data to restore from the original source disk/volume to the current destination disk/volume. After selecting a disk/volume, you can then right-click the mouse button, and display the corresponding operation options.

Note: If there is no mouse attached in your environment, you can select a disk/volume with TAB and Arrow keys, then press the Menu key to display the menu. The disk/volume changes you make will not take effect until you select "Commit" from the Operations menu or click "Next" to commit all changes.

Current Destination Disk/Volume Layouts
