D. BATTERY CHARGER CONTROLS

NOTE: A buzz, or hum is normal when the output cables have been disconnected and the AC power cord is still connected to an electrical source (i.e. wall outlet).

Model 11-1567-0
Two switches permit Battery Type and Charge Rate selection.
Switch #1 (3 Modes)
Mode 1 – Manual Position: Use for charging in 2 A or 10 A charge rates on 12 V batteries only. This charging must be monitored and manually stopped when the battery is charged. Overcharging will damage the battery.
Mode 2 – Automatic Position for Conventional Batteries. If you are not sure of your battery type, use the (regular) conventional setting.
Mode 3 – Automatic Position for Maintenance-free and Deep-cycle batteries.

Switch #2 (2 Charge Rate Modes)
Mode 1 – Select the 2 A setting to charge small 12 V batteries (31 Ah or less) or to warm larger lead-acid batteries.
Mode 2 – Select 10 A for larger 12 V batteries for a faster charge.

Model 11-1571-9
Two switches permit Battery Type and Charge Rate selection.
Switch #1 permits selection of either regular battery in automatic operation or Deep-cycle battery in automatic operation. If you are not sure of your battery type, use the regular battery setting.

Switch #2 (4 Charge Rate Modes)
Mode 1 - Select 15 A, 6 V Manual Operation to charge medium and large size wet-cell, lead-acid, 6 V batteries. Do not charge small batteries such as used in motorcycles, lawn and garden equipment. Note: Manual Operation. Monitor frequently while charging a battery.
Mode 2 - Select the 2 A, automatic setting to charge small 12 V batteries (31 Ah or less) or to warm larger lead-acid batteries.
Mode 3 - Select 15 A automatic for larger 12 V batteries for a faster charge.
Mode 4 - Select 100 A Engine Start to assist in engine cranking of 12 V systems. DO NOT use on 6 V systems. Use the 100 A Engine Start position for cranking automobile or light trucks. Note: Use only with battery in the vehicle. This will reduce the chance of damaging sensitive electronic equipment in the vehicle.

Model 11-1569-0
Two switches permit Battery Type and Charge Rate selection.
Switch #1 permits selection of either regular (conventional) or Maintenance-free and Deep-cycle batteries. If you are not sure of your battery type, use the conventional setting.

Switch #2 (3 Charge Rate Modes)
Mode 1 – Select the 2 A setting to charge small 12 V batteries (31 Ah or less) or to warm larger lead-acid batteries.
Mode 2 – Select 12 A for larger 12 V batteries for a faster charge.
Mode 3 – Select 75 A Engine Start to assist in engine cranking of 12 V systems. DO NOT use on 6 V systems. Use the 75 A Engine Start position for cranking automobiles or light trucks. Use only with battery in the vehicle. This will reduce the chance of damaging sensitive electronic equipment in the vehicle.
