---

Have you ever been in a situation wherein you were leisurely listening to a chill music, watching a new episode of your favorite TV series, or frantically adding finishing touches to your art document on your Mac just to reach your deadline when the app you are currently using stopped working and it won't properly reboot? I know, it's frustrating, and it happens.

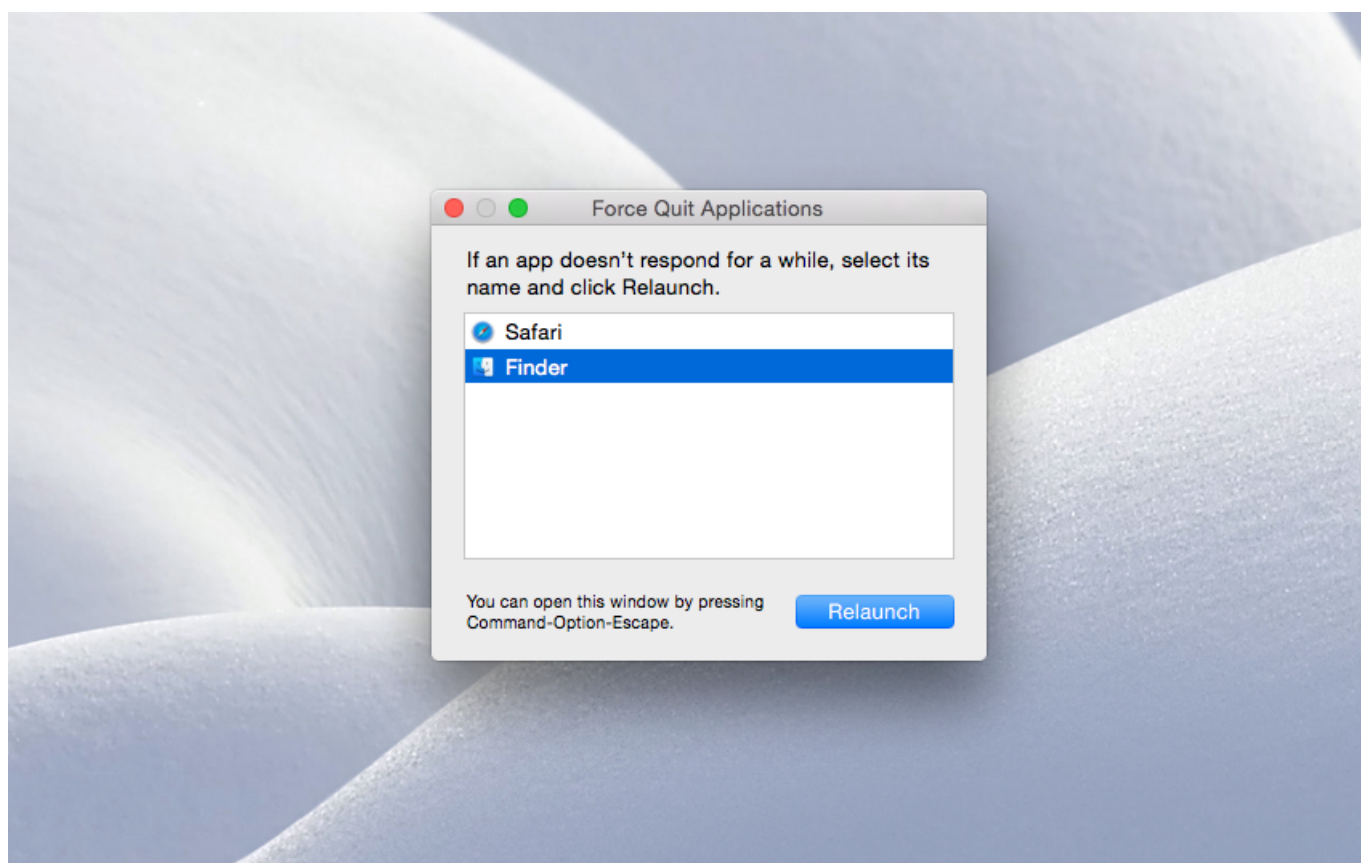

1. [force quit software mac](#)
2. [force quit software windows](#)
3. [force quit software center](#)

What is even more frustrating is that you need to start over, wasting your time and energy.. This happens to any type of device and it can even happen to a reliable device like Mac.. So what do you do if the Mac application you're using suddenly stops responding? How do you close an app that won't quit normally?.
